

I: 镁离子电池相比锂电池能量密度提升了近一倍，这意味着使用了镁电池的电动车，纯电续航也将有质的提升。但目前由于电解质等技术壁垒，要大规模量产并取代锂电池还为时过早。

I: Magnesium ion batteries compared to lithium battery energy density mention rose nearly doubled , which means the use of a magnesium battery electric vehicles , pure electric aircraft will also be continued qualitative mention liters. But currently the technical barriers to the electrolyte , etc., to large-scale production of lithium batteries and also substituted when too early.

H: 锂电池或将被淘汰 能量密度更高的镁电池亦大势所趋

H: Lithium batteries will be phased out or energy density higher magnesium battery is also the general trend
